 **ROODSAFE™**
HEIGHT SAFETY SOLUTIONS

HISTORY

Roodsafe was established in 2002 and has risen to be a market leader in height safety solutions

With Operations in
Europe - Middle East - South Africa - Canada

SOLUTIONS

Roodsafe offer a full turnkey solution; design, manufacture, installation and annual maintenance and service.

All systems have a 25 year warranty.

PRODUCTS

Cable systems | Free standing handrail
Mobile man anchors | Bespoke ladders
Training | PPE Personal Protection Equipment
Test and inspection of installed systems
Lightning protection systems

DESIGN

Cars are constructed of strong, lightweight, one-piece solid aluminium. The pinstop feature allows movement of cars along track, closing it locks the car in position.

DURABILITY

Cars and track are available in black Hardkote or clear-anodised finishes for corrosion protection and durability.

BALL BEARINGS

Torlon® ball bearings handle loads, reducing friction allowing the operator to move smoothly along the track. Stainless steel wire guides keep ball bearings captive when cars are removed for maintenance.

OPTIONS

The Access Rail system can be mounted in the vertical or horizontal plane. It is also available with a wheel toggle configuration to achieve angles of up to 90 degrees.

CERTIFICATION

CE certified and tested under EN795. 2012 Type B/D

SPORTS STADIUM SPECIALIST

Roodsafe manufactured, designed and installed 5000m of 8mm cable based height safety system to King Abdulla Sports City, Jeddah, Kingdom of Saudi Arabia.

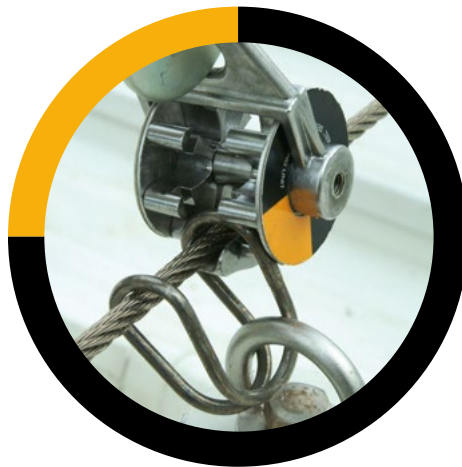

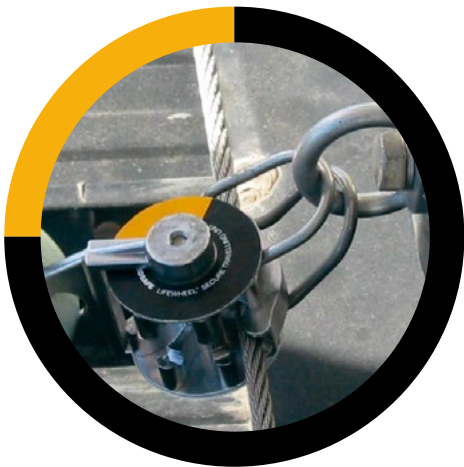

Fixed to KALZIP Standing seam roof sheet achieving 100% non penetration, using the S5 Fixing block.

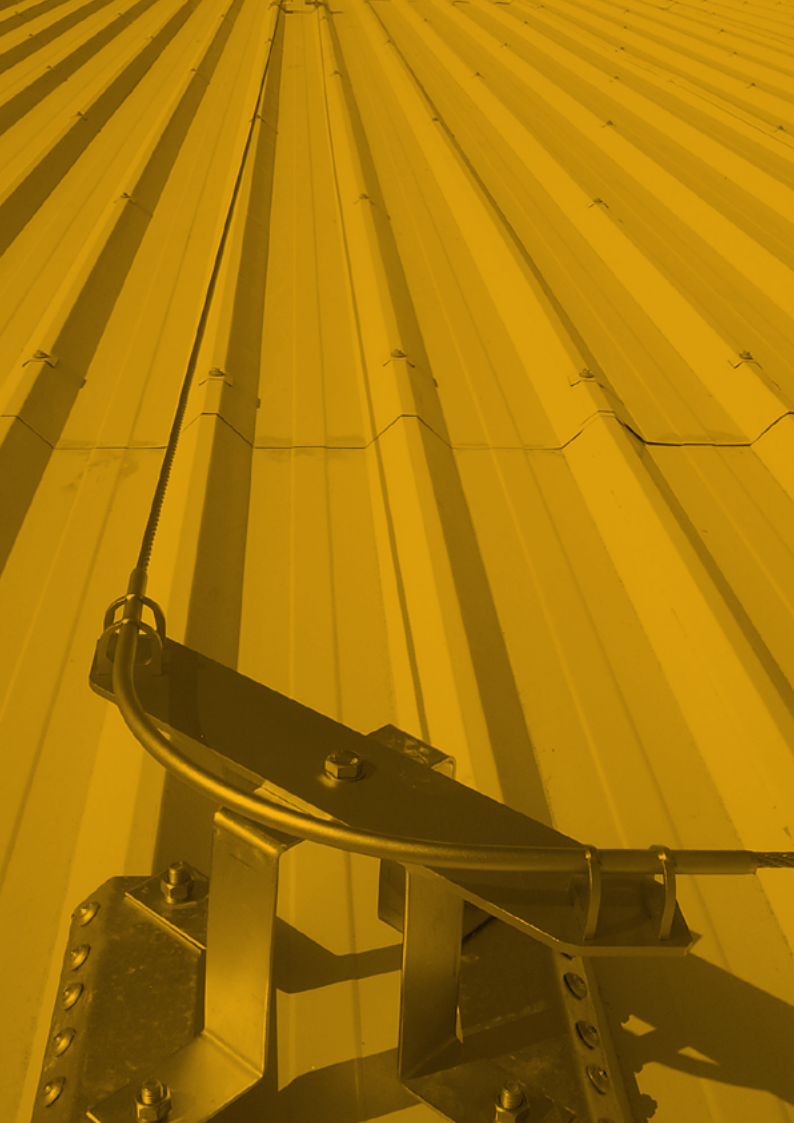

EMIRATES AIRLINES SKY CARGO

AIRPORT SPECIALIST CONTRACTOR

Roodsafe installed safety systems
to Dubai Airport Aircraft Hangar
to facilitate safe maintenance
work on aircraft.

ANNUAL TEST AND INSPECTION

Full test and inspection of installed safety system to European and American Standards.

Testing services

- Lightning systems
- Eyebolts
- Fall arrest systems
- Christmas light anchor points
- Hanging basket anchors
- Gutter clearance
- PPE supply

Standards: EN 795-7883-EN 395-BS 6651 - Ansi 379

Test requirements

Systems require testing at least once every 12 months and immediately after having been used in the event of a fall

Listed as Civil and Mechanical Engineers, Roodsafe is classified as "competent" in accordance with current European standards. As such, we are qualified to test all forms of safety systems that have been installed to current European standards, regardless of who installed them originally. This offers a truly independent test

The services we are able to offer include:

- Test and inspection of cable fall arrest systems
- Inspection of PPE (Personal protective equipment)
- Test and inspection of Cradles system and Gantries
- Test and inspection of handrails and mobile man anchors
- Full repair and maintenance of fall arrest systems

LIGHTNING PROTECTION

Design and installation.

Annual test and Inspection.

Lightning protection solutions.
